RE: Village Pretreatment Permit Application

Dear Susan:

I have enclosed a recently received Pretreatment Permit Application from the Village. Our current permit will expire June 15, 1990. In light of all the changes to Cerro's wastewater system expected in May at Building 80 and July at the Tube Mill, I phoned Tom Thompson to see if he could extend our permit until October 1, 1990. He said he could not give the extension because the permit is required by ordinance.

Mr. Thompson recommended that we fill out the attached application and then submit it to the Village. We should note in the application the expected changes and when we know the details of the changes, we should file an amended application.

Do you agree with this course of action? If you have any additional recommendations or comments, please notify me soon because the permit application is due by February 28, 1990.

Very truly yours,

CERRO COPPER PRODUCTS CO.
